

Bird Forms

JOE FEREBEE BIRD BODIES

A high quality bird mount begins with high quality bodies.

Joe Ferebee bird bodies meet this criterion. They are exceptionally accurate in their anatomy with indentations for

correct placement of legs and wings. A slot is provided on many forms for correct tail placement. Constructed with a high quality foam, they provide good stability yet allow easy wiring.

Use in conjunction with Ferebee artificial heads and bills or with the flexible game bird heads and necks. Producing a quality bird mount has never been easier.
