Serious Sportsmen TAXIDERMISTRY FOR BEGINNERS

Taxidermy has changed dramatically in the past decade. Methods that were common ten years ago have slipped into oblivion as new technology has produced easier and more effective methods. There is only one booklet course that trains beginning taxidermists in this new technology: "Serious Sportsmen Taxidermy for Beginners." This set of seven booklets includes 29 lessons that take you from the basics of skinning and tanning, all the way through full body mounts of squirrels, fish, birds and big game shoulder mounts. Each lesson is profusely illustrated with dozens of clear black and white photographs and diagrams to guide you every step of the way. It is written in plain English and does not require any previous taxidermy knowledge to understand.

You'll learn not only what steps to follow to complete a project, but the reason for every procedure. You will develop an understanding of the principles of taxidermy while working on projects that become increasingly more challenging.

If you want to get started in the fascinating world of taxidermy, there's no better place to start than the Serious Sportsmen Taxidermy course. It is also ideal to use in conjunction with our video course listed on the following pages.

BP3000 (Seven Booklets)set 32.95
