## LATEX GLOVES

Protect yourself from exposure to rabies, Lyme disease, infections, etc. while you're skinning with these economical latex

gloves. Good for wearing when working with epoxies or resins. Will not impair your dexterity or sensitivity. Ambidextrous (fits either hand). Prepowdered for easy insertion and removal. One size fits all.

- LG12 (1 dozen) ..... each 3.75
- LG100 (box of 100) ..... each 12.25

## PAINT SPRAY RESPIRATOR

Protects against sprays of enamels and lacquers. Protects against sprays of vitreous enamels and varnishes plus dusts, mists and sprays associated with paint spraying. Instruction sheet outlining applications, use and limitations is included in each package.

- 95115 ..... each 49.95

## PAINT AND VAPOR RESPIRATOR CATRIDGES

For use in half mask dual respirators (listed above) these cartridges are rated for organic vapors, mists of paints, lacquers and enamels, dusts and mists.

The useful life of a chemical cartridge for vapors will vary with the concentration and nature of the gas contaminant. The cartridge should be replaced as soon as the vapor is tested through the cartridge by the wearer.

- 95111 (2 cartridges) ..... each 20.95
- 95112 (prefilters) ..... each 4.95

## DISPOSABLE DUST MASKS

Prevent dry chemicals, dust, pigments, etc. from being inhaled. Good to wear when sanding foam mannikin or spray painting with water-based paints. Not rated for lacquer fumes - use a paint and vapor respirator (listed above) instead. Elastic straps and flexible metal nosepieces.

- 99498 ..... each 2.25

## CHEMICAL APRON - BLACK POLYPROPYLENE

This heavy-duty chemical-resistant black rubber apron protects against dangerous chemicals. Black polypropylene construction with cloth ties at the neck to knees. It is also handy for messy fleshing and beaming operations. Blood and grease just rinse away. Keeps clothes and both protected when working with tanning chemicals, paints, sandblasting, etc.

- APR6 ..... each 31.95

## HEAVY-DUTY CANVAS APRON

Heavy-duty canvas aprons with canvas tie string. Washable. Will last for years. Navy blue-jean denim. Waist high, hardware pocket and convenient pencil pocket.

- APR5 ..... each 16.95

## GREEN VINYL APRON

This lighter weight (20 mil) chemical resistant vinyl apron will comfortably protect you and your clothing from liquid chemicals, blood and most solvents. Large size (4' long by 3' wide) protects from your neck to below your knees. Machine washable.

- APR7 ..... each 17.75

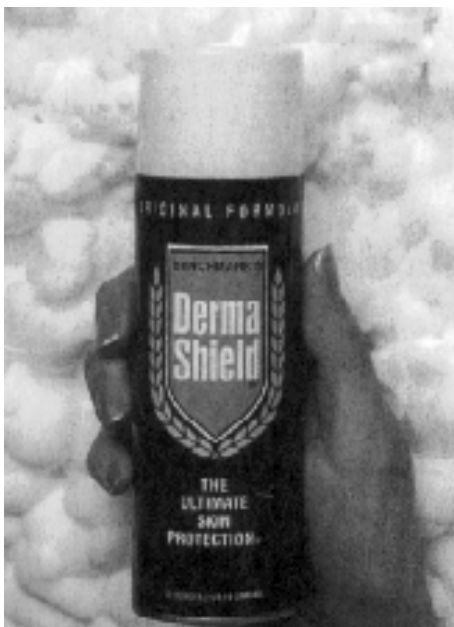

# Safety

## DERMA SHIELD

(formic acid - formaldehyde - alcohol - acetone - dry preservative - finishing epoxies)

Formaldehyde and acetone are known carcinogens (cancer-causing agents) and invade the body directly through contact with the skin.

We use all these products - and more, every day in our work to produce trophies that will last a lifetime for your clients. What are they doing to your skin? Are your hands rough and dry, discoloured or even cracking from exposure to these chemicals? Ours were! Not any more! We were introduced to a new product called Derma

Shield and have been using it every day. This is a skin protector that sets up an invisible barrier to just about anything you can get your hands on (or in to). We don't wear gloves for the most part except when mixing tanning solutions. Very often we are in direct contact with diluted acids when shaving skin, acetone when bonding ears... and Magic Sculp during finish work. As a consequence, our hands scream for lotion that doesn't entirely help. Derma Shield, with a ph of 7, produces a strong enough barrier to repel straight contact with hydrochloric or carbolic acid, yet it is safe enough for even a baby's bottom to prevent diaper rash. If you do wear gloves all day. Derma Shield will protect your hands from irritation caused by constant use, especially if you are at all allergic to latex. If this seems like a truly miracle product, it is! It's not too late to preserve your skin and even avoid more serious problems in your future. Better yet its very economical, only 4 cents an application.

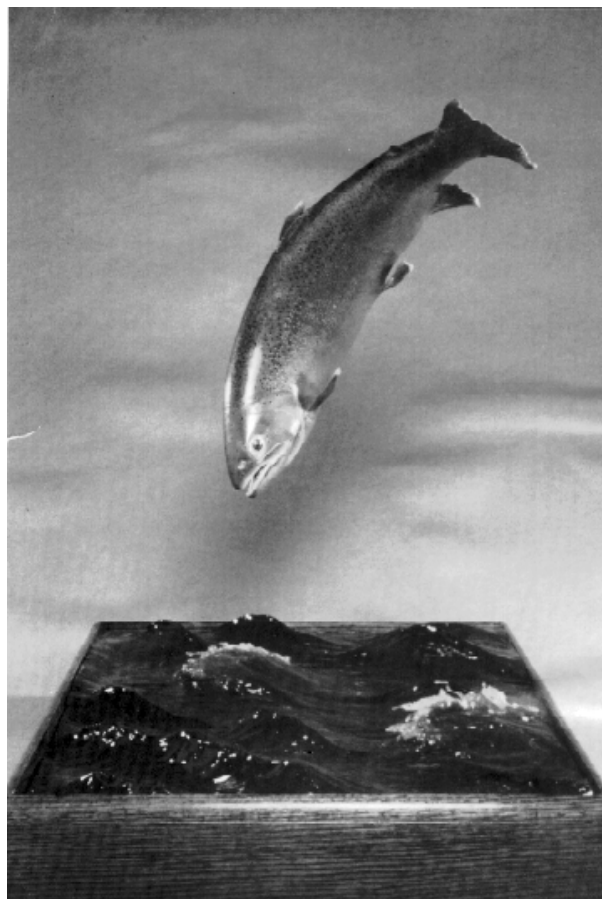

DS (2 oz. spray can) ..... each 11.95

## Gary Bowen's KEVLAR FLESHING GLOVES

Designed especially for the taxidermist. Prevents accidental cuts while fleshing or carving. Helps reduce down time and major injury. These gloves are cut resistant 100% Kevlar, the aramid fiber used in bullet-resistant vests. They are made with an extra long 5" cuff that protects wrist and lower forearm. The hand area has flatgrip dots for a more sensitive feel that helps to hold on to wet slippery hides. One glove can be worn on either hand and one size fits all. Machine washable and heat resistant keeping skins cooler because of no heat transfer from hands to hide. Available in medium and large.

GBG-M (medium)..... each pair 24.95  
GBG-L (large)..... each pair 24.95
